User/Installer Responsibilities

Limited life parts must be accompanied by lifetime service history including total time / cycles / time since new.

It is important to understand that the existence of this Document alone does not automatically constitute an approval. Where the user/installer performs work that acceptance of the national regulations of an airworthiness authority that the user/installer ensures that this/her airworthiness authority accepts aircraft engine(s) / propeller(s) in Block 1.

Statements in Blocks 13d and 14a do not constitute a certification. In all cases, aircraft maintenance records must contain an appropriate certification issued in accordance with the national regulation by the user/installer before the aircraft may be flown.
